Preface

02/14/2026

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aeque doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguique possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane Stoicos irridente, statua est in quo a nobis philosophia defensa et collaudata est, cum id, quod maxime placeat, facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet, ut et voluptates repudiandae sint et molestiae non recusandae. Itaque earum rerum defuturum, quas natura non depravata desiderat. Et quem ad me accedis, saluto: 'chaere,' inquam, 'Tite!' lictores, turma omnis chorusque: 'chaere, Tite!' hinc hostis mi Albucius, hinc inimicus. Sed iure Mucius. Ego autem mirari satis non queo unde hoc sit tam insolens domesticarum rerum fastidium. Non est omnino hic docendi locus; sed ita prorsus existimo, neque eum Torquatum, qui hoc primus cognomen invenerit, aut torquem illum hosti detraxisse, ut aliquam ex eo est consecutus? − Laudem et caritatem, quae sunt vitae sine metu degendae praesidia firmissima. − Filium morte multavit. − Si sine causa, nollem me ab eo delectari, quod ista Platonis, Aristoteli, Theophrasti orationis ornamenta neglexerit. Nam illud quidem physici, credere aliquid esse minimum, quod profecto numquam putavisset, si a Polyaeno, familiari suo, geometrica discere maluisset quam illum etiam ipsum dedocere. Sol Democrito magnus videtur, quippe homini erudito in geometriaque perfecto, huic pedalis fortasse; tantum enim esse omnino in nostris poetis aut inertissimae segnitiae est aut fastidii delicatissimi. Mihi quidem videtur, inermis ac nudus est. Tollit definitiones, nihil de dividendo ac partiendo docet, non quo ignorare vos arbitrer, sed ut ratione et via procedat oratio. Quaerimus igitur, quid sit extremum et ultimum bonorum, quod omnium philosophorum sententia tale debet esse, ut eius magnitudinem celeritas, diuturnitatem allevatio consoletur. Ad ea cum accedit, ut neque divinum numen horreat nec praeteritas voluptates effluere patiatur earumque assidua recordatione laetetur, quid est, quod huc possit, quod melius sit, migrare de vita. His rebus instructus semper est in voluptate esse aut in armatum hostem impetum fecisse aut in poetis evolvendis, ut ego et Triarius te hortatore facimus, consumeret, in quibus hoc primum est in quo admirer, cur in gravissimis rebus non delectet eos sermo patrius, cum.

Hello, Typst!

Abstract

This is the abstract of this document. It is mainly about the introduction of me. Now is the 2026 New Year, and I like the winter than summer.I enjoy programming, and I have been learning programming laguages for a long time. Whatever R, Python, C, I like the programming languages. I also like learning new things, and I have learned a lot of things in the past few years. I am looking forward to learning more things in the future.

I hope this document can give you a better understanding of me.

1. Introduction 👽

This is the Section 1.

My name is **Joyboy**, which is a name from the anime **ONEPIECE** from Japan.

I like playing *Plants VS. Zombies*.

Figure 1: *bean shooter* is the plant I like best.

Figure 1 shows the plant I like best in the *Plants VS. Zombies* games. It does a lot harm to the zombies who walk deadly and stupid and silly. They are trying to eat my brain, but I won’ t let that happen in my garden.

这是我用 `Typst` 写的第一篇文档，简单，但是力求把所有的知识点都包含 在里面。

The last section is the bibliography of this document. It contains all the references I have cited in this document.

2. My interests

I like learning programming, although my major is clinical medicine. In my spare time, I will learn anything interesting for me. In the past few months, I have learned *R, Python, Java, Git, Linux, Docker* in a better way.

1. R
2. Python
3. C
4. Linux
5. Github

2.1. Typst

As is shown in Section 2.1 (see page 1), it is a new typesetting system.

I also like math, in *typst*, math equations are like $Q = \rho A v + C$.

If you want to make it have its own line, just like

$$Q = \rho A v + C \tag{1}$$

To add some variables such as

$$Q = \rho A v + \text{time offset} \tag{2}$$

$$7.32\beta + \sum_{i=0}^{\nabla} \frac{Q_i}{2} \tag{3}$$

$$a \rightsquigarrow b \tag{4}$$

- **arrows collections**

$$|\rightarrow| \tag{5}$$

$$\rightrightarrows \tag{6}$$

$$\Updownarrow \tag{7}$$

$$\infty \tag{8}$$

`R` and `Python` are relatively easier than other programming languages.

This is a block of `R` script:

```
getwd()
setwd()
```

Then `C`:

```
int main()
{
  printf('Hello, Typst!')
}
```

Then `Python`:

```
print("Hello, Typst!")
```

`Python`

```
import this
print("Hello, Typst!")
```

`This is the Hack font, which is a better display font for codes.`

`Jetbrains`

Set rules

- *text* to set font family, size, color, and other properties of text
- *page* to set the page size, margins, headers, enable columns, and footers
- *par* to justify paragraphs, set line spacing, and more
- *heading* to set the appearance of headings and enable numbering
- *document* to set the metadata contained in the PDF output, such as title and author

Figure 2: My new avatar.

Figure 2 is my favorite anima character.

These words can be centered and bottomed.

This project is embedded in the ✔ ArtosFlow project. ✔ ArtosFlow is a project of the Artos Institute.

This is the logo of the ♧ Redux.

$a^2 = b^2 + c^2$, 这是勾股定理。

Are these words blue? Yes, they are.

red words

terms

Ligature A merged glyph
Kerning Adjusting space between characters
Leading Adjusting space between lines

The following is a math equation:

$$\begin{aligned}\sum_{k=0}^{n} k &= 1 + \ldots + n \\ &= \frac{n(n+1)}{2}\end{aligned} \tag{9}$$

Equation 9 is the equation of the sum of the first n natural numbers.

- **sym** is the collection of mathematical symbols in Typst.

→
ℝ
ʊ
Ω
ℜ
⌞
∇
∯
$
¥
€

Hello
😀
5

- **code blocks**

Hello from the **world**

This is Typst's text. It explains *Typst* .

Sum is 6

The coordinates of the point are (1, 2).

The first number is 1, the last number is 4.

Shakespeare wrote Hamlet.

Tolstoy wrote War and Peace.

Shakespeare wrote Hamlet. Tolstoy wrote War and Peace. Cervantes wrote Don Quixote.
Shakespeare wrote Hamlet. Cervantes wrote Don Quixote.

a: 2, b: 1

1 < 2.

```
("a1", "b1", "c1")
```

```
("a", "c")
```

abc

3 is the length of the string “abc” .

😀

I got an ice cream for $1.50! 😀

- “apple” , “banana” , “cherry”
- “dog” , “cat” , “mouse”

1. first
2. second
3. third

a) staff
b) forget

1. Typst
2. Latex
3. Word

This is *emphasized.*
This is *too.*

This is *emphasized* differently.

- **attach**

$$\prod_{\beta}^{\alpha}{}_{4+5}^{1}{}_{6}^{2+3} \tag{10}$$

$$\sum_{1}^{2} \neq \sum_{1}^{2} \tag{11}$$

$$A = \pi r^2 \tag{12}$$

$$x < y \Rightarrow x \ngeq y \tag{13}$$

[0: A] [1: B] [2: C]

```
("A1", "B1", "C1")
((1, "A"), (2, "B"), (3, "C"))
```

```
((a: 2, b: 4), (a: 1, b: 5), (a: 2, b: 3))
```

```
((a: 1, b: 5), (a: 2, b: 3), (a: 2, b: 4))
```

3. Publication

```
(3,)
```

```
(3,)
(3,)
(1,)
```

My first article was published in 2024. [1] It took me a long time to accomplish this script, although I was only responsible for the *data processing* and final revising, which really left a deep impression on me.

4. Blog

I have created my own blog in two ways. One is the *github pages*, the other is the *Cloudflare pages*. So you can see my blog at the two websites:

- https://zhiwenhu471.github.io/
- https://hzwyyds.online/

5. Contact me

This is my Rednote account, you can follow me. I will post everything I have learned in Rednote.

You can also follow my *github* account by this code.
